

MICHAEL CREEK

VERO BEACH, FLORIDA

Michael Creek is nestled away into a beautiful pocket of Indian River County. Almost 3/4 of the development is waterfront properties - many of which have docking space and beautiful mangroves. Featuring large lots, a beautiful clubhouse, community pool and park areas, Michael Creek truit creates a waterfront village. The unique location, amenities and waterfront properties

really needed to be represented with the elegance that they command. Ironwood Properties needed a rendered site plan as part of their approval process that would double as a sales graphic; they turned to the graphics division of UDS. At UDS, we utilize the latest graphics software and aerial photos available in order to give a beautiful and accurate representation of a development.

Client: Ironwood Properties
Site Area: Approx. 26 AC
