

# BRIGHT FUTURES ACADEMY

PALM BEACH GARDENS, FL

**B**right Futures Academy (BFA) set their sights on expanding their private charter school to a larger building. After selecting a site with an existing building that suited their needs, they turned to UDKS to make their expansion a reality. The BFA contracted UDKS to provide a multitude of services ranging from site planning and landscape architecture, including government approvals, graphics, signage and logo design.

Traffic routing and pedestrian safety were paramount in the site layout. UDKS modified the circulation pattern to obtain the proper stacking distance for drop-offs.

As part of the signage concepts that UDKS created for BFA, we were also asked to update their existing logo to include the school's mascot - a bull shark. UDKS' design team researched this particular shark and created

a stylized character for inclusion into their newly created vector logo.
