

# CIELO at DONALD ROSS VILLAGE

PALM BEACH GARDENS, FLORIDA

The sky really is the limit at Cielo! Developed by Lennar Homes, Cielo is the 20-acre, residential component of the Donald Ross Village Mixed-Use Planned Unit Development located in northern Palm Beach County. The site plan is comprised of two and three story residential units, pedestrian networks linked by arched architectural features, landscaped garden spaces between buildings, a central pool and plaza, reflecting pool, and common spaces with trellis amenities located throughout the site. The Urban Design Kilday Studios team uniquely designed the site plan and landscape architecture with particular attention to the integration of preserved native vegetation and interconnections to the commercial area nearby. These two areas are interconnected via pedestrian networks, architecture, colors, landscaping, and detailed designs.

The detailed design of the amenities of Cielo are signatures of the project. These distinct designs are attributed to the UDKS graphics design team's allegiance to creativity, high quality, and advanced technology. A pedestrian corridor runs through the residential common spaces by the main pool area and reflecting pool, continues to the lake, and terminates in a waterfront plaza with a semi-circular trellis overlooking the lake. The four-sided, open air pedestrian arches located along the main pedestrian corridor add impressive design elements, and wayfinding to the pedestrian circulation throughout the site. The extensive trellis designs at the main entry contribute to an arrival experience of grandeur. The lush landscaping and ornate detail will make Cielo an outstanding part of the Palm Beach Gardens community.

**Client:** Lennar Homes, Inc.

**Site Area:** 20.24 acres

**Dwelling Units:** 156 Multi-family
